

RECLINERS

The Beast.

Tested for up to 500 pounds* of everyday use and features a 7-Gauge Steel Mechanism!

Frame: Each recliner is constructed of 1 1/8" hardwood seat frame joined together by six 2 1/2" lag bolts, doweled joints and glue.

Mechanism: The heavy-duty 7-gauge all-steel mechanism is designed to withstand up to 500 lbs* of everyday use. Every recliner features adjustable kick-out tension and is assembled and tested to assure smooth, reliable comfort.

Springs: 16 bar coils in the seat spring unit are heat-tempered for durability and long-life. A double lumbar spring design provides added support where it is needed most.

Cushions: Cushions are constructed of 2.3 - 2.5 density premium HR foam for comfort you have to feel to believe.

Features: A clever removable back provides for ease in handling and placement in your home. The unique "Easy Access" back design allows for repositioning or addition of polyester fiber that keeps this recliner looking good for years to come.

* Beast Space Saver® & Lift recliners tested up to 500 lbs.
